DECLARATION OF NO OBJECTION

Publication and public review of C++ project materials

PROJECT TITLE

Numerical Integration Visualizer Using C++

Full name: Anant Kumar

Enrollment number: 26125004

Programme / Branch / Year: B.Tech, DSAI - 1st Year

Institution: IITR

I, the undersigned student identified above, declare that I have no objection to my course instructor publishing the materials associated with the above project for public access and review, as set out below.

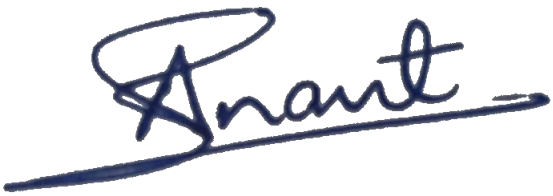

1. Source code on GitHub. After review, my instructor may upload the project source code to GitHub and share the link so that classmates and the public can download and review it, including assessing its originality and any copied or AI-generated content.

2. Video presentation on YouTube. After review, my instructor may upload my video presentation (video PPT) to YouTube and share the link for public viewing and review of my project and performance.

3. Article on a preprint server. If I submit an article relating to this project, my instructor may upload it to a preprint server for public access and review.

I understand that these materials and their links may be shared with classmates and the general public for review of my work, performance and originality, and to support the academic evaluation and marks awarded. I have no objection to this publication and review.

I have read and understood this declaration and give this consent voluntarily.
